

# Transforming Medicine with Devices, Deep Learning and the Cloud

*Come build the next \$100 billion dollar industry with us and change the world!*

## Join Us

**4Catalyzer is a Startup Accelerator Dedicated to Maximizing Societal Impact**

We have created a unique environment where bright, highly committed scientists are given the freedom, ownership, and resources to solve today's most challenging problems in health care. The work is extremely fast-paced, multidisciplinary and will profoundly change the world.

**Our current needs include:**

### **Sr. Scientist Molecular Biology**

- Ph.D. in Biochemistry, Molecular Biology or related field
- Track record of breakthrough nucleic acids methods innovation
- Experience developing novel protocols and kits
- At home in a highly multidisciplinary environment
- Ability to set up and operate complex instrumentation
- Tenacity to work in a fast-paced team environment
- Excellent verbal and written communication skills

### **Immuno-Oncology Research Scientist**

- Ph.D. in Immunology with postdoctoral or industry experience
- Demonstrated expertise in immunology research with an oncology focus
- Exceptional laboratory skills and work ethic
- Superb organization skills
- Demonstrable track record of creativity
- Excellent publication record
- Ability to collaborate within team setting
